

Now through 30.6.2017, users in EMEA who replace their progressing cavity pump with an original ALLWEILER® pump will receive a free replacement stator with their order.

The offer is valid for replacements of all ALLWEILER S-type pumps or any other manufacturer's models where possible. The recommended replacement will either match the user's existing fluid handling requirements and available footprint, or encompass an upgrade to improved pump material, size and energy efficiency performance. Installation can be by owner, ALLWEILER or one of our certified service partners.

Email an ALLWEILER specialist at [ae-emea-ge@colfaxfluidhandling.com](mailto:ae-emea-ge@colfaxfluidhandling.com) to tell us about your fluid handling requirements and receive a quote. We would be happy to serve you. More than 155 years of experience coupled with German quality provide the foundation for one of the most reliable and efficient pumps on the market.
